

e-Justice

Net Group helps governments and organizations develop their justice area to a new level by designing work processes that are efficient and customer friendly. For that we use an innovative approach, modern technologies and great design.

COURTAL

A COURT INFORMATION SYSTEM THAT HELPS

- Digitalize court processes
- Organize and manage collaboration activities executed by the court and other related parties in order to make court procedures faster and more efficient

BENEFITS OF COURTAL

- **Increased efficiency** of court proceedings
- **Accuracy:** trackable version history for all documents
- **Measurability:** analyze every part of the process. The system will provide statistics about judges' workloads
- **Traceability:** the system logs all activities regarding proceedings by specific individuals and provides consistent overview of case statuses

BENEFITS FOR YOUR COUNTRY FROM COURT DIGITALIZATION

- Attraction of foreign investments by offering trusted public services
- Creation of new jobs
- Increased international competitiveness
- Improved state reputation

REFERENCES

- **Estonia:** 100% paperless court system
- **Sulaymaniyah, Kurdistan:** The running cost of a single court case reduced up to 3 times
- **International Criminal Court:** re-design of user experience for international justice making
